# CALVILIGO®

## Vitamin D3 and Mineral Dietary Supplements

### FOR THE FOLLOWING PROBLEMS

Bone deformities	Rachitic rosary
Growth reduction	Osteoporosis
Fracture	Fragile egg shells
Limping	Decreased egg-laying
Necrosis of the femoral head	Drop in the number of egg hatching

### CALVILIGO® PROPERTIES

Vitamin D3 helps regulate blood calcium levels by promoting calcium's intestinal absorption. Administered without calcium, vitamin D3 will demobilize bone calcium to stabilize calcemia, thus worsening demineralization. D3's active form acts on the synthesis of the Ca transporter that helps this macroelement get through the intestinal mucosa.

**Manganese, zinc, copper, magnesium and calcium** work together to create a combination essential to building bones and shells.

### WHY USE CALVILIGO®

**Calviligo®** is a liquid dietary supplement specially formulated to prevent egg shell fragility, drop in laying and hatching, growth reduction, osteoporosis and necrosis of the femoral head.

### INSTRUCTIONS

**Calviligo®** is used as a feed complement at a ratio of :  
1 litre/1000 L of drinking water for 4 days, every 15 days.

**Does not require any withdrawal before slaughter.**

### INGREDIENTS

Vitamin D3  
Calcium propionate  
Zinc sulfate  
Magnesium sulfate  
Manganese sulfate  
Copper sulfate
