# HYDRASOL®

STIFLING HEAT - DEHYDRATION - STRESS

## Complete Dietary Supplements

### HYDRASOL® BENEFITS

By virtue of its composition, Hydrasol® creates the perfect synergy between highly effective ingredients at every physiological phase of poultry.

**Sweltering Heat:** Hydrasol® is highly recommended during intense heat periods. Its effectiveness has been proved in Africa and Europe's hot climates.

**Stress of any type:** diet change, noise, light, temperature change, caging, barn and flock thinning, transport, debeaking, vaccination, etc.

All stresses immediately lead to an increase in urinary tract pH and thus decreases immune defences.

Veal and poultry brooding/starting (supply energy, vigour, viability).

- Hydration
- Bird brooding
- Heatstroke prevention
- Weak appetite
- Spiking
- Lack of energy or activity
- Promotes weight gain in the last week

### ELEMENT PROPERTIES

**Vitamin D3** helps regulate blood calcium levels and acts as a carrier of this macroelement. It also promotes calcium's intestinal absorption.

**Vitamin E** is involved in cellular metabolism and as an antioxidant and detoxifying agent.

**Vitamin C** promotes immunity by stimulating antibody production. It is also involved in cellular respiration.

**Glycine and citric acid** allow the absorption of water and sodium at the cell level of the intestinal tract's mucosa.

**Magnesium** increases the urinary volume and purifies the kidneys.

**Dextrose** provides a highly assimilative energy supply. This form of carbohydrate requires no enzymatic activity (lactase). It is directly assimilated by cells.

**Does not require any withdrawal before slaughter.**

## **INSTRUCTIONS**

Chicks starting, periods of high heat and stress  
1 to 2 litres/1000 litres of water for 3 to 4 days

## **MAINS INGREDIENTS**

Vitamin D3

Vitamin E

Vitamin C

Glycine

Citric acid

Magnesium

Dextrose

Sodium

Potassium
