- 25 kg

OVI-PLUS®

Dietary Supplement Vitamins and Trace Elements

USE BENEFITS

Interests of use

For ewes

- Promotes natural stress resistance.
- Promotes resistance to infectious diseases.
- Stimulates antibody production in sheep, in order to facilitate the transmission of antibodies to the lambs, via colostrum.
- Reduces nutritional deficiencies and subdeficiencies of the ewe during fetus growth.
- Promotes the main functions of digestive and respiratory organs.
- Promotes proper bone building and growth as well as hoof formation.
- Promotes toxin elimination through metabolic detoxification (food dejection and microbial toxins).
- Increases ewe life expectancy.
- Facilitates lambing (increase white muscle tonus for expelling the lamb).
- Promotes blood oxygenation of the mother and fetus during lambing.
- Increases lamb viability.
- Increases lamb weight and homogeneity at birth.
- Maintains good sanitary and reproductive status of the herd, in order to optimize zootechnical results.

Lamb

- Promotes natural stress and disease resistance (non-specific immunity).
- Prevents digestive disorders (diarrhea).
- Prevents pulmonary problems.
- Promotes proper bone formation.
- Increases digestive functions, metabolization and food assimilation.
- Stimulates and eliminates metabolic toxins.
- Increases zootechnical performances.
- Best average daily gain (ADG).
- Best Feed Conversion (FC).
- Better return on carcass.
- Better carcass classification.
- Better meat quality.
- Promotes antibody production to improve transition to antibodies transmitted by the ewe.

INGREDIENTS

Vitamin A
Vitamin D3
Vitamin E
Vitamin C
Vitamin B12
Biotin
Selenium chelate
Iron chelate
Cobalt chelate
Zinc chelate
Manganese chelate
Calcium
Magnesium chloride
Sepiolite

DOSAGE ET ADMINISTRATION

For ewes

Gestation : 4-5 gr / day / ewe the last 50 days of gestation

Nursing : 4 gr / day / ewe during the 20 days, after lambing

Lamb

First 40 days : 3 gr / day / lamb

Day 41 to day 70 : 2 gr / day / lamb

Being very careful and actively preventing a maximum of pathological disorders by the proper stimulation of the main organic functions are two key elements of good ovine production performance.

OVI-PLUS® has been designed to provide maximum livestock performance.
